

York and Ensign Platforms, UK North Sea

884

Gangway
Transfers

Duration: 14th
March 2021 to
5th April 2021
(22 days)

Client: Spirit
Energy

Home Port:
*Great
Yarmouth, UK*

Background: Spirit Energy required walk to work access for around 30-35 workers to undertake upgrade and commissioning activities related to bringing a new Gas Well on stream at the York and Ensign platforms in the Southern sector of the UK North Sea.

Solution: Bibby WaveMaster 1 provided accommodation and transport to the platforms. The gangway delivered easy access for client crew to the work location. The charter was completed successfully with no incidents or lost time.

Core Work Scope:
W2W Services

“

From start to finish, and experiencing two different crews, they were both, polite, competent, knowledgeable and nothing too much as is often the key to success is co-operation and communication and both crews did this superbly. Vessel and crew worked in harmony to provide an excellent service and all requests were met with positive responses.”
