Bibby Marine secures 3-year contract with TotalEnergies EP Nederland

Bibby Marine are elated to announce they have secured a 3-year contract with TotalEnergies EP Nederland B.V., chartering Bibby Marines Flagship Walk to Work (W2W) vessel Bibby WaveMaster 1.

The charter encompasses working on the Dutch Continental Shelf in the Southern North Sea in 2022, 2023 and 2024. The duration will be a minimum of 180 operational days potentially extending 236 days each year.

Bibby Marine have previously worked with TotalEnergies EP Nederland in 2018 – 2020 for W2W and accommodation services for various campaigns. This was a step change to how TotalEnergies EP Nederland would normally operate either using accommodation modules or jack up barges and helicopters which in turn helped TotalEnergies EP Nederland decrease their impact on the environment. The WaveMaster 1 will likely be completing more than 10 gangway connections per day across the Dutch Continental Shelf. Bibby Marine's Innovative walk to work vessel Bibby WaveMaster 1 will accommodate some 70 TotalEnergies EP Nederland personnel, ensuring that whilst they are not at work on the platforms, they can remain comfortable onboard with quality spacious cabins and tasty meals tailored to the company's requirements.

This upcoming charter continues the strong relationship Bibby Marine has with TotalEnergies EP Nederland, and demonstrates the excellent customer service they provide, leading to client satisfaction.

Mark Whitehead, (Senior Commercial and Client Manager) from Bibby Marine said

"We are delighted to be working with TotalEnergies EP Nederland again for the next three years. We are looking forward to building on our experiences from our previous campaigns to deliver three successful years of campaigns. We were so proud to have achieved high marks for Quality, Systems and Management, during our yearly performance review and we are striving to exceed those marks during our next three years together."

Erik Korf, (Operations Manager) from TotalEnergies EP Nederland stated

"TotalEnergies EP Nederland is looking forward to a safe and fruitful collaboration with Bibby Marine. We welcome the Bibby WaveMaster 1 and her crew to continue the good level of collaboration for the 3 years to come."
