

Floating Accommodation Solutions

Turnkey rapid-deployment floating accommodation, delivered where you need it, when you need it.

BIBBY
MARINE LIMITED

Why choose Bibby Marine?

Bibby Marine owns and operates a fleet of high-quality accommodation barges accommodating between 180 and 700 persons, deployed globally in support of major coastal projects. Each vessel functions as a fully serviced residential facility, offering en-suite cabins with exterior views, commercial kitchen and restaurant, gymnasium, lounge bar and coffee shop, laundry services, and meeting rooms, with reliable broadband Wi-Fi available throughout.

Progress offered us secure, high-quality accommodation which worked well in our projects remote and tropical location." DIBP

The vessel arrived well in advance and was welcomed by those living onboard. The quality of the vessel was excellent, and the en-suite bedrooms and public facilities were well received amongst our workers." PETROFAC

Flexible & mobile

An accommodation vessel wherever you need it.

High quality & comfortable

Provide the best for your workforce.

Improved worker lifestyle

Quality catering facilities and relaxing recreational areas.

Safe & fully serviced

Rely on our onsite crew to look after everything.

Minimal environmental impact

The ideal solution for remote and environmentally sensitive locations.

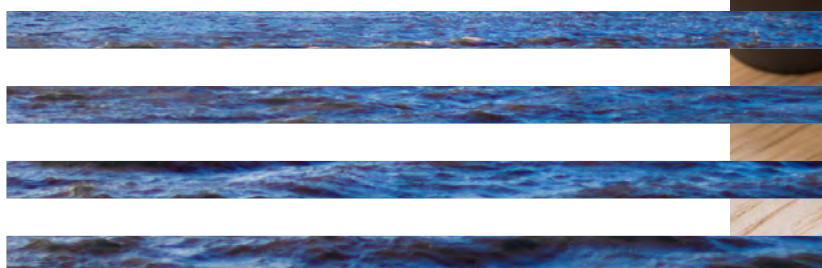

Affordable

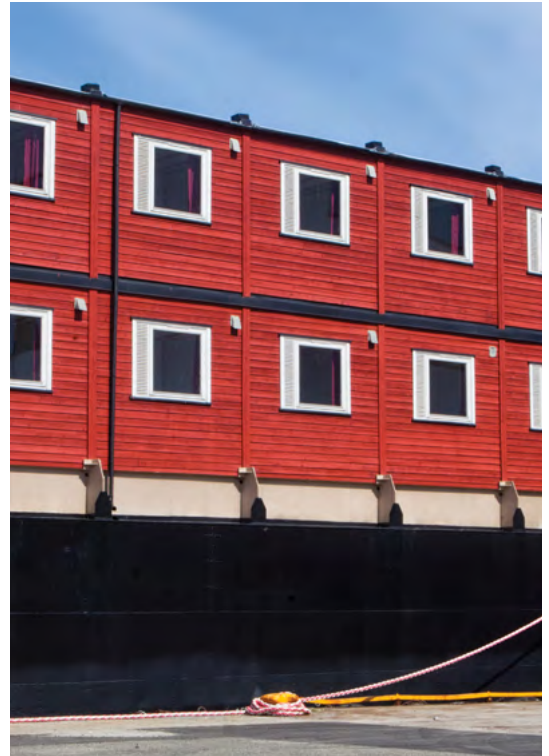

Cost-effective alternative to hotels and land camps.

Key advantages

- **Zero Schedule-Delay Risk**
Barges are ready to deploy—protecting your critical path and avoiding costly delays.
- **Fast Deployment**
Mobilisation in weeks, not months. Minimal onshore preparation required.
- **Minimal Environmental Impact**
No land disturbance or utilities installation. Fully self-contained systems.
- **Centralised Workforce Management**
Easier logistics, compliance, and productivity in one controlled environment.
- **Reduced Traffic & Safer Roads**
Shuttle transport reduces congestion and risk of road traffic accidents.
- **Community Benefits**
No pressure on housing or services, local jobs, and procurement.
- **High Safety & Compliance Standards**
Our vessels are maintained in class and meet MARPOL and ISO standards.
- **Modern Living Spaces**
En-suite cabins, recreation, Wi-Fi.

- **Features** En-suite cabins, gym, recreation lounge, Wi-Fi
- **Dining** Full catering facilities
- **Ideal for** Large-scale projects requiring rapid deployment

Progress

- **Capacity** 650 guests
- **Features** Office space, meeting rooms, fitness facilities
- **Dining** Modern galley and dining area
- **Ideal for** Projects needing integrated workspace & accommodation

Renaissance

- **Capacity** 664 guests
- **Features** Premium cabins, leisure areas, high-speed internet
- **Dining** Modern galley & dining area
- **Ideal for** Long-term deployments

Tweed

- **Capacity** 360 guests
- **Features** Compact design, efficient layout, recreation lounge
- **Dining** Self-contained catering facilities
- **Ideal for** Smaller projects or remote locations

Trent

- **Capacity** 670 guests
- **Features** Flexible accommodation, Wi-Fi, communal spaces
- **Dining** Full-service kitchen
- **Ideal for** Short-term or specialist projects

Our Services

We're here to make looking after your workers as easy as possible. We offer hassle free workforce accommodation and all the services your workers need. Our experienced team will project manage your charter from start to finish. From 'bare-boat' to 'turnkey' we can look after as little or as much of life on site and with over 30 years experience, with Bibby Marine you're in safe hands.

Catering & Housekeeping

We can provide a fully integrated onboard hospitality solution tailored to your requirements, including catering, housekeeping, cleaning and laundry services. Alternatively, clients may elect to manage these services directly. Our flexible delivery model allows you to select the operating structure that best suits your project.

Maintenance

Our experienced technical professionals and facilities managers work proactively to keep our vessels fully operational and shipshape throughout the charter period - giving you one less operational risk to manage.

On-site management

We can manage access to the vessels through robust security controls, or provide a dedicated reception service for your staff, depending on your operational and security requirements.

At Bibby Marine, we work hard to provide high quality accommodation & seamless project management for our customers.

Project support

Our professional team has the experience and knowledge to look after your project from initial enquiry to post charter support.

Flexible payment

We offer cost-effective workforce accommodation. We'll work with you to create a payment plan to suit your project needs.

Slaapschepen

When Slaapschepen in the Netherlands, needed a flexible accommodation solution, they discovered Bibby Marine's floating barges through their professional network.

This marked the beginning of a successful partnership, with Bibby Marine providing both the vessels and the expertise to adapt and operate them to the project's specific needs. Following an extensive refurbishment of the onboard facilities, Progress and Renaissance have been on hire in Zaandam since 2024, providing flexible, comfortable and affordable accommodation.

To date, Slaapschepen has highlighted Bibby Marine's open-minded and friendly approach, as well as the professionalism of both onshore and offshore teams. Rob Mus, Slaapschepen General Manager said: "We chose to work with Bibby because of the people. "From the very beginning – sales, contracting, right through to delivery and operation – everyone was open, transparent, and genuinely committed to making our project a success." The project continues to be delivered with strong cooperation and mutual respect.

From the very beginning – sales, contracting, right through to delivery and operation - everyone was open, transparent, and genuinely committed to making our project a success.

Rob Mus, Slaapschepen
General Manager

Sustainability & Compliance

Our barges are maintained in class and meet MARPOL, and ISO standards, ensuring safety and environmental responsibility. Fully self-contained systems reduce land impact, and local procurement supports community economies.

Floating accommodation requires minimal site preparation and remediation before and after deployment, reducing the CO2 emitted per year compared to land-based accommodation.

Performing better in terms on CO2 emissions with more compact constructions and lower heating and cooling demands compared to land-based accommodation.

Project Management

Bibby Marine is adept at navigating the unique challenges associated with floating accommodation. We bring our unparalleled knowledge and experience to all of our projects.

With years of industry knowledge and a track record of efficient and reliability, Bibby Marine navigates the complexities of floating accommodation with precision. Whether you are looking to utilise our existing accommodation barges, or require a bespoke solution, our experienced team can seamlessly coordinate the entire process.

We offer comprehensive solutions for all of your accommodation needs, expertly managing every aspect, from site selection and logistics, right through to offering bespoke solutions.

Custom-Built Barges – Designed Around Your Project

As an alternative to our existing fleet, Bibby Marine can design and construct a new accommodation barge tailored precisely to your project requirements. Vessel size, capacity, layout and onboard functionality can all be customised to align with your operational objectives and workforce profile.

This solution is particularly suited to projects with an 18-24 month lead-in before charter commencement. It enables the delivery of a purpose-built asset designed specifically around your capacity, technical and workforce wellbeing requirements.

The process begins with a jointly developed, client-led design brief. This defines key parameters such as cabin numbers and occupancy levels, cabin sizes and en-suite standards, dining capacity and restaurant concepts, operational back-of-house requirements, and the desired range of recreational and welfare facilities.

Facilities may include gyms, indoor sports or games areas, walking decks, pools or courts, and amenities such as a coffee shop, bar, library, meeting rooms and quiet spaces.

Following agreement of the brief, we develop concept layouts for review, then progress to detailed design and 3D visualisations to fully validate functionality, compliance and aesthetics before construction.

Construction commences only after final client approval. Throughout the build programme, we provide structured progress reporting, with agreed inspection milestones allowing client representatives to review quality, compliance and programme performance firsthand.

For projects commencing in one to two years' time - particularly where future fleet availability cannot be guaranteed - this approach provides the most reliable means of securing a bespoke accommodation solution, delivered to specification and within a commercially competitive framework.'

The future is up to you, tell us what you need, and we'll build it:

- Concept render of a custom-designed barge
- Diagram / render showing flexible layout options
